

## Hydrant Flushing

Customers of the East Windsor Municipal Utilities Authority are being notified of our semi-annual hydrant flushing program.

To maintain high quality of water and reliable service to our customers, the East Windsor Municipal Utilities Authority will begin opening fire hydrants to flush sediment from its pipes, monitor water flows and pressures, and provide visual inspection of the hydrants. Customers may notice a drop in water pressure or may experience discolored water. At no time will the water quality be compromised. The water is safe to use.

Below is a list of the scheduled dates of the areas we will be flushing:

Twin Rivers Section of the Township and Centex area are scheduled for the week of October 19, 2020 through October 23, 2020.

Windsor Regency, Georgetown, Cranbury Manor, Stonegate and sections of Rt. 130 are scheduled for the week of October 26, 2020 through October 30, 2020.

Hickory Acres, Brooktree area, Renaissance Estates, Princeton East, Oak Creek Estates, Riveria, neighborhoods along Dutch Neck Road, One Mile Road and sections of Rt. 130 are scheduled for the week of November 2, 2020 through November 6, 2020.

The above dates may be subject to change due to conflicting work that must be done by Authority personnel. Please check our website [www.eastwindsormua.com](http://www.eastwindsormua.com) for updates on areas being flushed.

### **During the flushing program, East Windsor Municipal Utilities Authority is offering its customers the following tips:**

- Check for discolored water by running the **COLD** water only before using the washing machine or dishwasher. Wait until the **COLD** water runs clear at the tap before doing laundry or operating the dishwasher. **Note: If laundry becomes stained, do not put your laundry in the dryer.** Rewash cloths immediately using detergent and add a rust remover. Most rust removers can also be used on stained fixtures.
- If water pressure or water volume seems to be low after hydrant flushing has been completed, check faucet screens (aerator) for trapped particles.
- Place garbage and recycling containers behind the curb to avoid obstruction.
- Refrain from placing loose leaves and debris at the curb as this will only create a problem for the storm drains. Place the leaves and debris at least a foot from the curb to allow the water to run freely.

The East Windsor Municipal Utilities Authority apologizes for any inconvenience. Thank you for your patience during this time. If you have any questions or comments, please contact the East Windsor Municipal Utilities Authority at (609)443-6000.
